

Arena Honeycomb Shades

Save energy in style

 **TURNILS®**

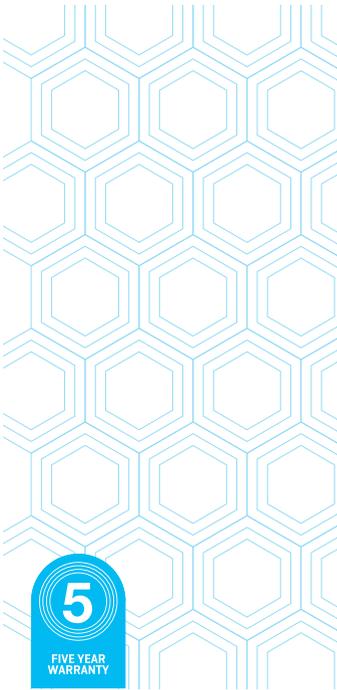

Sophisticated, functional & energy efficient

Perfect for any size or shape window, Arena shades offers insulating properties to control room temperature without compromising on style.

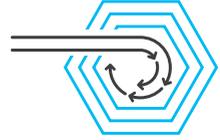

A variety of fabric opacities and design options cater to individual needs for light control and privacy.

Why Choose Arena Honeycomb Shades ?

Energy Efficient

Tested and proven to help you save on your energy costs – better for your pocket and the environment.

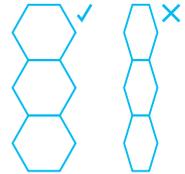

Child & Pet Safe

Go for one of our cord free control options such as Cordless or Motorisation, for the ultimate child safe solution.

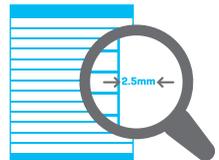

Smart Construction

Specially designed with Perma-Cell technology preventing stretching - cells remain looking and performing at their best.

Minimal Light Gaps

The compact headrail delivers light gaps as low as 2.5mm in recess fit, compared to 10-15mm for most roller blinds.

^^ The scale for sound absorption is in a range from 0.00 to 1.00 where 1.00 means total, 100% total absorption of sound. The scale can be equated to percentages – for example a value of 0.35 would indicate approx. 35% sound absorption.
Source: Hunter Douglas USA Reference Guide April 2010.

Advanced Operation

Versatile solutions for every space or shape, including skylights, so every use is an effortless experience.

Quiet Achiever

Sound energy is absorbed within the cell, dulling exterior noise by up to 52%^^ with 20mm Translucent Fabric.

Healthier Indoor Air

Fabrics are anti-static & dust repellent making them low maintenance. Arena fabric meets the certification requirements set by GREENGUARD® for Low Chemical Emissions and helps to reduce indoor air pollution and the risk of chemical exposure, while aiding in the creation of healthier indoor environments.

Save on your
energy costs
with Arena's
superior
performance⁺

Arena's clever cellular design traps air which helps to insulate the room.

Arena Honeycomb Shades have been tested and proven to help reduce the cost⁺ of heating your home.

Enjoy warmer winters and cooler summers as Arena fabric's slows down heat transfer through the window for year round comfort.

The back of all Arena honeycomb fabrics is white, creating a uniform streetside appearance. The white backing also provides light reflection and UV protection, which reduces heat passing through the shade into the room.

MEDIUM

Up to 17%⁺ in energy savings with Harlem 10mm Single Cell Translucent fabric

HIGH

Up to 26%⁺ in energy savings with any Arena 20mm Single Cell or Kinship Double Cell Translucent fabric

VERY HIGH

Up to 28%⁺ in energy savings with Harlem 10mm Single Cell Blockout fabric

EXCELLENT

Up to 32%⁺ in energy savings with any Arena 20mm Single Cell Blockout fabric

⁺ Savings are based on the installation of fully-recessed, reveal-mounted Arena fabric as specified above in an average home in Sydney, compared with the House Energy Rating standard of Holland Blinds from AccuRate, in that home. These calculations have been modelled by an independent third party. Savings will vary based on window type and installation.

Child Safety

With child safety an important consideration, you can put your mind at ease knowing there are a variety of solutions available in the Arena range.

For the ultimate child safe solution select a cordless operating system such as our Cordless or Motorisation systems which feature no loose operating cords.

For more information on these systems see our 'control options' on page 14.

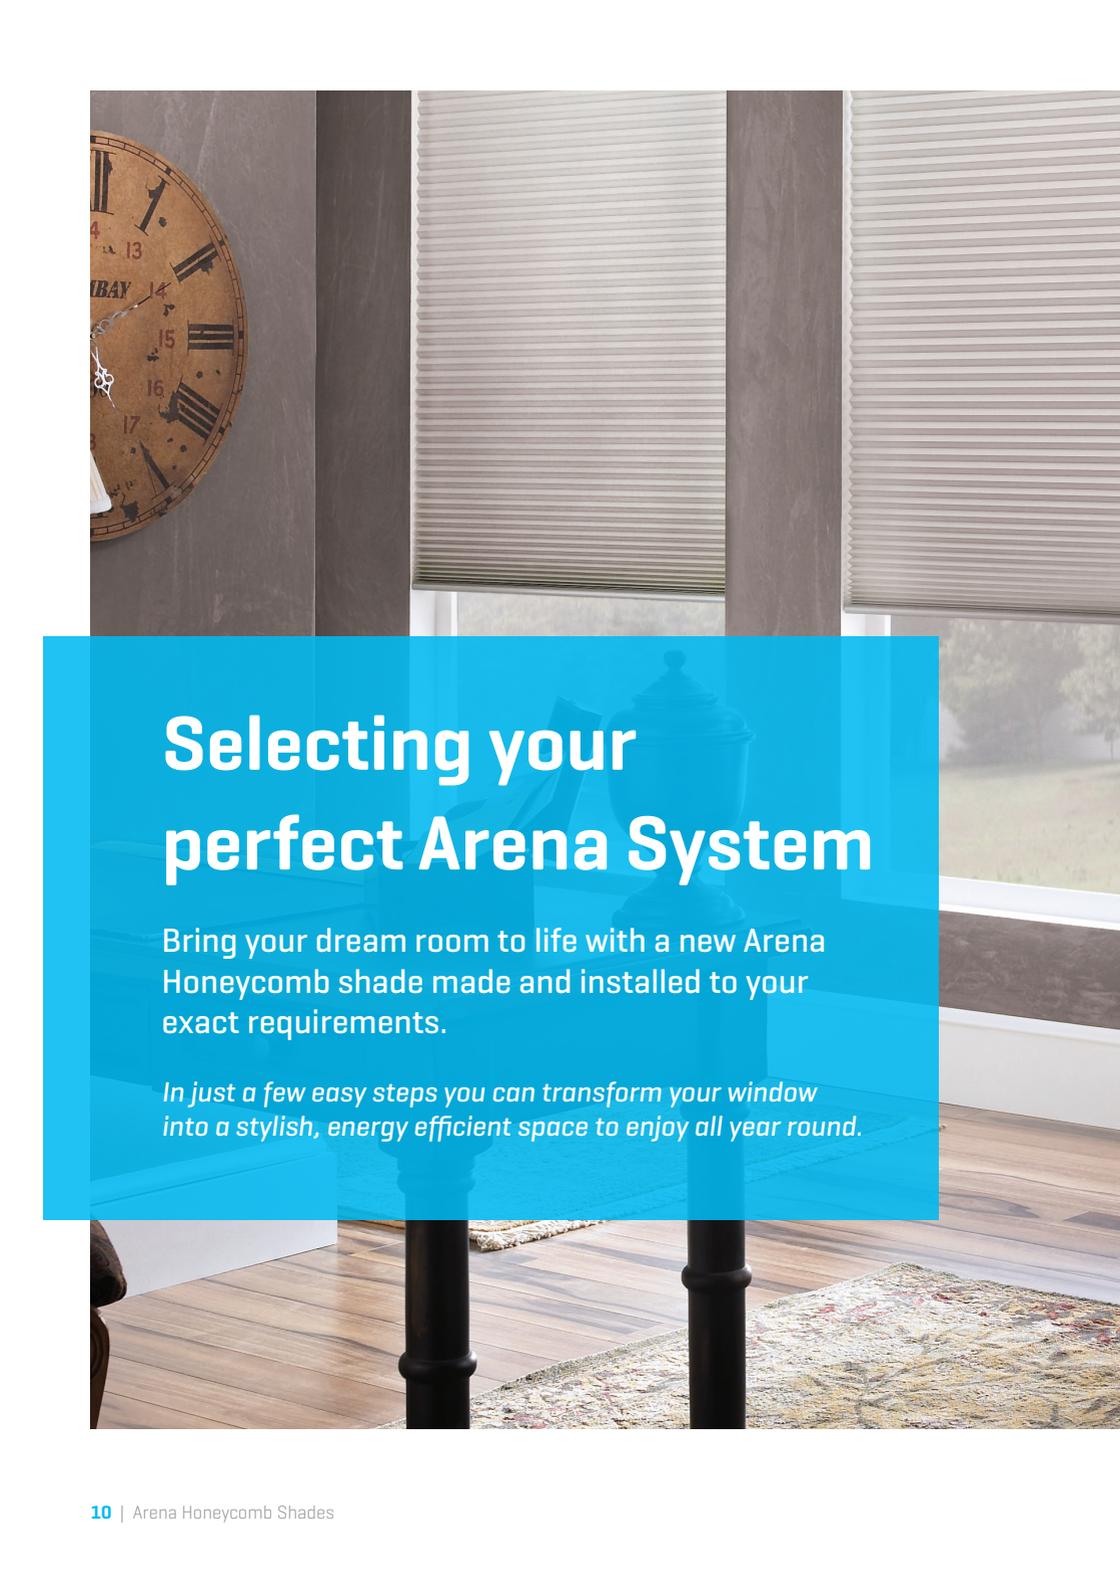

Child Safety Tips

Make it safety first around your windows by always ensuring:

- Items that a child could climb on are away from windows that have cords or chains. This also includes placing cots, beds and chairs away from windows.
- Cords are secured as installed by looping around the cord cleat at all times.

All Arena corded window coverings come with child safety operation warning tags and safety cord cleats for holding operating cords.

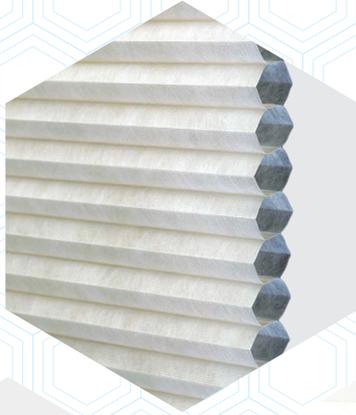

Selecting your perfect Arena System

Bring your dream room to life with a new Arena Honeycomb shade made and installed to your exact requirements.

In just a few easy steps you can transform your window into a stylish, energy efficient space to enjoy all year round.

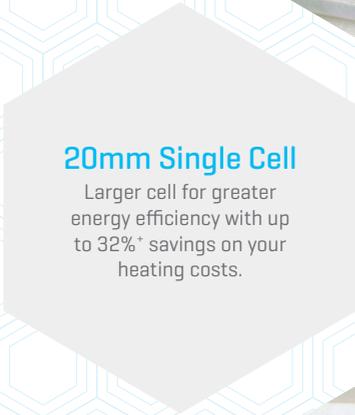

Choose your Cell Size

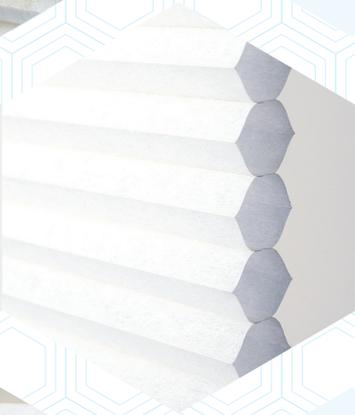

10mm Single Cell

Compact air pocket with classic narrow projection, saving you up to 28%* on your heating costs.

20mm Single Cell

Larger cell for greater energy efficiency with up to 32%* savings on your heating costs.

Double Cell

Double Cell is an innovative, side-by-side cellular construction that provides enhanced thermal insulation, keeping out summer heat and winter cold.

Choose your Fabric Opacity

Sheer
Gently filter light while still enjoying the view through the windows.

Translucent
Soften harsh light while maintaining privacy and protecting your furnishings from UV fading.

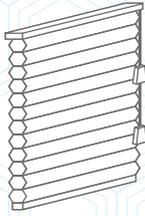

Blockout
Provide excellent energy efficiency and ultimate light and privacy control.

Choose your control option

Start by selecting your operating system which controls the raising and lowering of the shades.

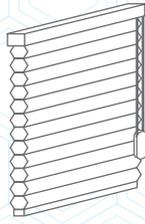

Child Safety

Consider a cordless option for a child and pet safe solution.

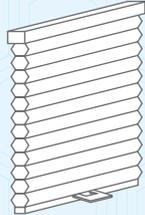

Classic Cord Lock

Slimline hardware for an unobtrusive appearance when shade is fully raised. Operational cords are neatly secured by cleats.

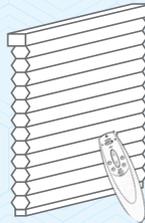

EasyRise

Featuring a continuous cord loop operation with a geared clutch, the EasyRise system offers smooth operation for lifting even the largest shades.

Cordless

Raises and lowers shades at the bottom bar. Provides an uncluttered look and is the ideal solution for child safety.

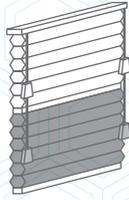

Motorisation

A motorised control system allowing shades to be operated with one touch via remote control.

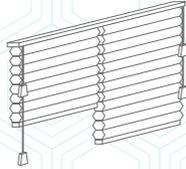

Choose your design option

Depending on where your blind will be installed, you can choose a design option that's perfect for your needs.

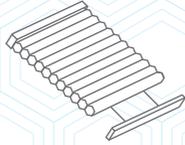

Day-Night Blinds

Enjoy the best of both worlds when combining a sheer and blockout fabric on the one shade.

Two-on-One Headrail

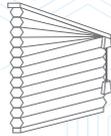

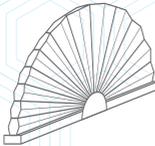

For larger windows, patio doors or window/door combinations, two separate blinds can be mounted on the one head rail, with each blind able to be lowered and raised independently.

Skylights

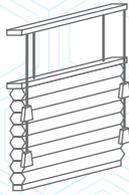

Arena Honeycomb Shades are ideal for skylights and sloping or hard-to-reach windows.

Depending on fabric selected, a complete blockout solution can be created.

Specialty Shapes

Honeycomb Shades are available in a selection of specialty shapes for arched and angled windows.

Top down/Bottom up

Allows the shade to be raised from the bottom as well as lowered from the top, for complete light and privacy control.

Glideshift

A specially designed control option for use with sliding and patio doors as well as wide expanses. Operation is via a pull handle which enables Glideshift to move the shades open and closed.

Fabric Collection

Designed for style and performance.

When selecting the right fabric for your space, remember to consider:

How much light do you want to filter in?

Do the blinds need to provide a high level of insulation?

Will the blinds be a focal point in your space or coordinate with your furnishings?

What is AMP™ Motorisation?

AMP motorisation is designed to deliver next level innovation with a smart, seamless user interface offering convenient operation of your honeycomb shading at the press of a button. A lithium rechargeable battery pack produces 500 up/down cycles per charge. This roughly equates to 9 to 12 months of battery life.

Low DC voltage with no electrician required to install.

Controlled via a 15 channel remote control, wall switch or APP using USB Bridge.

AMP™ USB Bridge allows bi-directional communication with shade position reporting & battery level status.

Voice control integration with Amazon Alexa, Google Assistant, Apple shortcuts and IFTTT.

Operating My Shades With AMP™ Motorisation

Remote Control

The shades all feature variable speed control and can be controlled via a 15-channel radio frequency remote control. Available in white and black colour options, the remote includes a magnetic holder for mounting and can be programmed to activate a favourite position by a quick touch of a button or operate multiple shades at a time. Unlimited shades can be programmed onto the same channel.

A slightly different version of the remote is available for all Top Down/Bottom Up and Day-Night honeycomb shades allowing operation of the middle and bottom rails. Available in white only, this remote offers all the same features as the standard remote.

Top Down/Bottom Up and Day-Night honeycomb shades remote.

Wall Switch

Wall Switch

A surface mount wall switch featuring a sleek design and large display screen is also available. The wall switch includes 15 channels and all of the same features as the remote.
